EXPERIENCE

COMPUTER VISION LAB(ECE) | Graduate Researcher
2019 – 2021 | Baltimore, MD
· Developed a novel training method for face anti-spoofing problems, using only real data, where spoof images are approximated by gaussian distribution [**pdf**] .
· Explored ***self-attention based transformer networks*** for incorporating local information in images. *manuscript available on request*

IIIT-D BIOMETRICS LAB | Undergraduate Researcher
2016 – 2019 | New Delhi, India
· Implemented a ***triplet metric learning*** based algorithm for biometric recognition involving cross modal and cross resolution data [**thesis**]
· Achieved state of the art on periocular datasets with proposed algorithm [**link**]
· Advisor(s): Prof. Richa Singh and Prof. Mayank Vatsa

CENTER FOR AI, IIITD | Research Intern
2018 | New Delhi, India
· Led the R&D team responsible for building face recognition system for Yamaha Research, Japan.
· Built & shipped the final product to be fitted at golf carts for personalized greetings.
· Received *conference travel grant* as part of appreciation for the job. ***Skills: PyTorch***
